

Ranpak Cushioning Systems... the Natural Choice

PadPak[®] Senior

*powerful in protection,
versatile in application*

Excellent Cushioning Performance Created by a Multi-ply Paper Pad

The PadPak Senior is an extremely versatile 2- or 3-ply paper packaging system that can accommodate all in-the-box packaging needs and applications from cushioning to wrapping, and blocking and bracing.

The PadPak system converts multi-ply kraft paper into cushioning pads to protect your products. Inside the converter, the paper layers are crimped together, trapping air inside the layers to form a cushioning pad. The pads can be produced on demand or by batch production. Extremely versatile, the converter is height adjustable, rotates and can be used in a vertical or horizontal position.

Versatile - several modes of operation allow for batch production or in-line, on demand use

Flexible - adaptable and adjustable for seamless integration into any packing environment

Excellent Shock Absorption - 2- or 3-ply pads provide excellent cushioning

Environmentally Friendly - 100% biodegradable, recyclable and renewable paper
