

PILLOW PAK'R®

Air Cushion System

Offers revolutionary, patented air-transfer technology providing, green superior protection

FEATURES:

- Green Tuff Blend Resin
- Recycled Content -
Made of 12% HDPE
- Air-Transfer Technology -
Best-in-Industry Protection
- Reduces Damage
- Environmentally Friendly

INVENTING THE FUTURE OF PACKAGING

PILLOW PAK® Tuff Air Cushion material is the right choice for the environment and for protecting your valuable products.

PILLOW PAK air cushion material saves money by eliminating traditional bubble transportation, handling and storage costs. One pallet of Quilt Medium film makes the equivalent of a full truckload of ½" bubble.

Unlike traditional bubble material, PILLOW PAK green film doesn't pop and lose its cushioning properties, because the film allows air to move (or transfer) within cells providing superior product cushioning and protection. It's easier to work with so packer productivity is increased.

PILLOW PAK green air cushion material is a better choice than traditional bubble, foam-in-place, or paper.

PILLOW PAK air cushion green material is the next generation of sustainable packaging.

Faster Inline Packing

- Fast, 72 LF/Min., in-the-box dispensing improves packer productivity
- Easier to use than standard bubble
- Option Winder available for multiple pack station applications

Machine and Film Specifications	
Machine	60 lbs., 20"W x 18"L x 16"H, 72 LF/Min.
TUFF Blend Film	30" W (un-inflated)
Standard Film	30" W and 16" W (un-inflated)

Products labeled 'biodegradable' are not offered for sale in the state of California. For more information please see: <http://www.fpintl.com/sustainable.htm>

One pallet of Quilt Medium film is equivalent to a full truckload of ½" bubble

Benefits over traditional bubble wrapping material

- Made from 100% recyclable material, reduces waste by being 99% air, and can be reused
- Fast: makes a 1,000 sq. ft. bundle in less than 8.5 minutes
- MAXIMUM FLEXIBILITY! Perforated every six inches for easy handling
- Emits 11% less greenhouse gas emissions and uses 11% less energy in its production
- Better protection because of Tuff Blend film strength
- Minimum warehouse storage needed

Environmentally Friendly Products

Our green air cushions contain an additive that accelerates biodegradation. They will biodegrade in 1 to 5 years or more, depending on conditions, when in the presence of microorganisms. Because conditions vary from place to place and landfill to landfill, the exact time for degradation varies depending upon the level of microbial activity. Compliant with European standard EN 13427.

Air cushions are 99% air
