# MAX 12<sup>™</sup> & MAX 20<sup>™</sup>

## Continuous Roll Bagging System

New machines add Videojet<sup>®</sup> printer, onboard 12.1" PCs, Allen-Bradley PLC

**MAX 12<sup>™</sup>**  
Bags up to 12" wide by 40" long

**MAX 20<sup>™</sup>**  
Bags up to 20" wide by 40" long

**Sharp's E-Z Bags<sup>®</sup> feed through the machine, are opened, filled with product, then sealed**

- **Technology advancements** include HMI, a networkable touchscreen PC running Windows<sup>®</sup> 7 embedded plus an Allen-Bradley Micrologix 1400 PLC
- **Faster, with huge gains in throughput**
  - Printing—50% faster than other printers
  - Reduced cycle times with the lighter weight aluminum jaw
  - Both horizontal and vertical loading capabilities—Run multiple applications on one machine
- **Cost savings**
  - No queuing reduces scrap and material cost with moveable printing head
  - Thermal ribbon usage reduced as much as 90% with simple adjustments
  - Longer lasting constantly heated sealing mechanism
  - Off-the-shelf parts
- **Troubleshoot quickly** on the PC based system with manuals and video clips on the HMI
