

Avistrap

Polyester Strapping

Constructed of high-strength polyester with superior elastic properties, Acme's Avistrap strapping provides dependable performance for light-to-heavy duty bundling, tying and unitizing applications. Avistrap features excellent elongation and recovery characteristics to stay tight and absorb impact shocks. It's safer to handle than steel strapping and will not damage forklift tires. Avistrap polyester strapping won't rust or stain your products when exposed to the elements.

Avistrap –

Regular duty non-woven polyester – ideal for securing lightweight packages. For use when hand tensioning, tying or using buckle joints.

Regular duty woven polyester – ideal for securing scrap bundles and a variety of miscellaneous loads. For use with manual tensioning tool.

Heavy duty woven polyester – ideal for heavy lumber and metals. For use on loads where high break strength and abrasion resistance are critical.

Strap Type	Nominal Break Strength (lbs.)	Nominal Strap Width (in.)	Coil Length (ft.)	Approx. Weight (lbs.)	Core Width (in.)	Coils per Skid
