

ASTRO-BUBBLE™ GREEN VALUE PROPOSITION

Astro-Bubble Green contains up to 40% recycled content to provide high-quality, durable protective air cushioning for surface cover, packing fragile items, and void-fill.

Astro-Bubble Green air cushioning bubble is designed to incorporate high levels of recycled content without losing product integrity, which provides the value our customers expect and moves us closer toward Pregis' own sustainability goal to use resources wisely.

Protecting beyond the box: Think Pregis

Astro-Bubble Green air cushioning bubble helps address the growing need for more sustainable packaging options. The distinctive light green color is transparent for easy product identification, and serves as a symbol of our "green" product.

Features and Benefits	Results
Minimum of 25% and up to 40% recycled content	Reduces landfill waste
Easy to identify light green color	Promotes purchases of recycled content products
Manufactured using reusable polyethylene resin	Recyclable*
Superior cushioning	Optimal surface protection

*Air cushioning is not accepted in all recycling programs; please consult your local recycler.

High quality, high value solutions

Pregis' Astro-Bubble Green air cushioning materials offer a smart, lightweight, clean and flexible alternative to loose-fill, product wrap or void-fill.

Customer	Environment
Protective packaging that addresses environmental concerns of the end consumers	Use of sustainable packaging lessens depletion and dependence on virgin resins
More cost-effective to ship, store and use	Light weight material uses less fuel for transport
Protective packaging made with recycled materials with no loss in performance	Increased preservation of virgin raw materials
