# Description

**Starview's FAB4-1012** is ideal for single operator high speed production runs. Given the proper conditions these machines are capable of up to 22 cycles per minute in production. The FAB Series automated rotary blister sealing machines are built with the capability to feed blister(s), blister card(s) and discharge finished packages when proper tooling is installed. These machines may be used for conventional carded blisters, full face blisters, double card trapped blister and half-clamshell styles.

For fully automatic machines with larger sealing areas, additional open loading stations or additional feeding stations see Starview's FAB Series, BSC Series and CBS Series brochures.

# Specifications

<i>Model</i>	<b>FAB4-1012</b>
<b>Sealing Area:</b>	10" x 12"
<b>No. of open stations:</b>	1
<b>Blister feeder:</b>	Standard
<b>Card feeder:</b>	Standard
<b>Finished package unloader:</b>	Standard
<b>Max blister depth:</b>	3.25"
<b>Average cycle speed:</b>	1-22 cpm
<b>Approximate size:</b>	55"D x 66"W x 65"H
<b>Approximate weight:</b>	1,500 LB.

Specifications and model availability are subject to change without notice.

Please request specific model quotations for complete pricing, specifications and options from your local distributor. Feel free to contact Starview to obtain the contact information for the authorized distributor in your area.
