

Ranpak Cushioning Systems... the Natural Choice

Create a portable packing station with the PadPak Jr.®

The PadPak Jr. converts 2 or 3-ply kraft paper into a cushioning pad for multiple packaging applications.

PadPak Jr. is easy to operate and requires minimal operator training. The pad is fed by raising the operator handle to the top position and holding the handle there until the desired pad length is dispensed. The pad is cut by lowering the operator handle to the bottom position.

The standard PadPak Jr. converter includes a head, former housing unit and standard casters.

PadPak Jr.®

*cushioning where and
when you need it*

- **Versatile** - cushioning pad can be used to pack most products that are shipped in a box
- **Simple** - electric feed / manual cut operation
- **Compact** - small floor-print makes it ideal for areas with limited space
- **Portable** - unit is on casters for ease of transport to multiple pack stations

Protection is in our nature™

Specifications

Converter (approximate measurements)*	
Width	33"
Height	60"
Depth	29"
Weight	110 lbs.
Power	120 VAC, 60 Hz, 1.4 Amps
Feed Rate	12 inches per second
Controls	Motor feed controlled by manual lever
Cut Method	Manual lever
Packing Height	55" (chute height)
Operating Modes	Manual cut
*Size specifications refer to the converter only and do not include the converter stand or accessories	

Paper Roll (Regular)
